INVESTOR DECK · OCTOBER 2026

A NEW ONE

The USDC front door to real-world assets and DeFi on Arc.

Live on Arc mainnet · anewone.xyz

İzzet Çakmak, Founder · Esin Çakmak, Co-founder · Member of the Circle Alliance Program

THE PROBLEM

Arc has real assets. A USDC holder has no single place to use them.

Scattered

Each fund, vault, lending market and bridge has its own app, its own steps and its own wallet prompts.

Opaque

Issuer, terms, minimums, whitelists and fees are hard to compare before you sign.

Elsewhere

Most USDC sits on other chains. Getting it onto Arc is a task of its own.

THE PRODUCT

One front door, four ways in

DeFi

Earn and Borrow on Aave V4 and Morpho, through Circle’s kits, in one signature.

RWA

Janus Henderson and New York Life IM funds via Centrifuge, plus Circle’s USYC. Stocks from licensed issuers next.

Bridge & Swap

USDC arrives over CCTP V2, Sui and Solana included. EURC and cirBTC via Circle Gateway.

AnewOne.Fun

USDC-priced token launchpad. Coins graduate into a locked Uniswap v3 pool.

Plus the Deckhand AI assistant and an x402 pay-per-call agent API.

`Never custody · never issue · never advise`

WHY ARC

On Arc, USDC is the only asset a user needs

What Arc gives us

USDC is the gas. No second coin to buy before the first trade.

Fast, final blocks. 0.51 s average block time, measured by our own indexer.

Predictable fees. Every quote shows the full cost before signing.

Circle products in the stack

- CCTP V2 and Gateway
- Earn Kit and Borrow Kit
- USYC tokenized money market fund
- Onramp: card to USDC on Arc

WHAT SHIPPED

From launchpad to front door in four weeks

Sep 2026	Arc mainnet: $NOAH is the first coin on the platform	18 Oct	Aave V4 joins Earn and Borrow
30 Sep	Earn and Borrow on Morpho via Circle’s kits	21 Oct	Portfolio: one read-only view of a wallet
1 Oct	Centrifuge funds JTRSY, JAAA and HYB listed	28 Oct	EURC and cirBTC via Circle Gateway; Swap on Arc
9 Oct	USYC joins the Funds page	Next	Stocks from licensed issuers

Also live: Sui as a CCTP source (10 Oct), the x402 agent API, the Deckhand assistant.

TRACTION · ON-CHAIN

Early, small, and all of it verifiable

94
outside wallets traded

376
trades

15.2K
USDC volume

230
USDC in fees paid

11 / 13
coins launched by outside creators

48
$NOAH holders

Beyond Fun: 41 swaps through the site on LI.FI, 773 USDC (2–30 Oct). DeFi and fund flows are not yet tagged on chain.

BUSINESS MODEL

Small, visible fees on every door that moves money

Door	Fee to A NEW ONE	Detail
AnewOne.Fun trade	1.0%	Plus 0.5% to the coin’s creator
Borrow on Morpho	0.15%	Origination; 10% of it goes to Arc
Borrow on Aave V4	0.15%	Interface fee on each draw
Pay with a non-USDC asset	0.25%	Shown as its own line
Earn, funds, USDC bridging	0%	Today; Circle and curator fees only

Every fee is in the quote before the user signs. Revenue grows with Borrow and Fun volume.

WHERE WE SIT

The interface between issuers and USDC holders

Issuers and protocols

- Centrifuge funds
- Circle’s USYC
- Aave V4 and Morpho
- Licensed stock issuers (next)

A NEW ONE

- Find and compare
- Buy, earn, borrow in USDC
- Every fee in the quote
- No custody, no issuing

Users and agents

- Wallets on any CCTP chain
- Card buyers via Onramp
- AI agents via x402

TRUST

Built in the open, checked by the ecosystem

- Member of the Circle Alliance Program since 10 Oct 2026, listed in its directory
- Listed in the Arc Open Source Showcase
- MIT open source: contracts, site and indexers. Contracts cannot change after deploy.
- 87 contract tests, including a rehearsal on a fork of Arc mainnet. No external audit yet.

TEAM

Two people, one shipping cadence

İzzet Çakmak

FOUNDER · DEVELOPER

Arc Tier-1 Ambassador, building on Arc since its testnet. Writes the contracts, the site and the indexers.

izzetc.com · @izzetcakmak35

Esin Çakmak

CO-FOUNDER · DESIGN

The brand, the visual identity and the look of every page.

linkedin.com/in/esinc35

Based in Türkiye. No company entity and no outside investors yet.

A NEW ONE

Real-world assets on Arc, for anyone with a wallet.
